Project Title: Online Movie Ticket Booking

Problem Statement:

The "**Online Movie Ticket Booking**" system aims to automate the movie ticket booking process, providing a convenient and efficient alternative to manual bookings. It offers real-time movie listings, showtimes, and seat selection for customers.

Requirements:

1. Display cities with selected theatres.
2. Manage multiple halls in each theatre, with one movie show per hall at a time.
3. Organize multiple shows for each movie.
4. Allow customers to search for movies based on title, language, genre, theatre, and city.
5. Provide theatre and showtime details for selected movies.
6. Enable customers to select a show, choose seats, and book tickets.
7. Show the seating arrangement, indicating available and booked seats.
8. Offer multiple payment options: credit/debit cards, cash, or UPI.

Roles or Actors:

1. Administrator
2. Officer
3. Customer
4. Guest

1. **Administrator:**
   Administrator manages the whole system.
   - Register
   - Login
   - Update Profile
   - Add Movie
   - Update Movie
   - Delete Movie
   - View movie details report

- View customer details report

2. **Officer:**
   Officer is the theatre counter staff who assists customers.
   - View movie list
   - Search Movie
   - Book Tickets for customer at theatre
   - Cancel Tickets

3. **Customer:**
   Customer is a registered user who books tickets online.
   - Register
   - Login
   - View Profile
   - Update Profile
   - View Movie List
   - Search Movie
   - Book Ticket
   - Cancel Ticket
   - Make Payment (Card / UPI / Cash (only through officer))

4. **Guest:**
   Guest is an unregistered user.
   - View movie list
   - Search movie

Main Features of the System:

1. User Management
2. Movie Management
3. Movie Search
4. Ticket Booking
5. Seat Selection
6. Payment Processing
7. Ticket Cancellation

8. Report Management

System Modules

1. User Authentication Module

Functions:

1. Register user (Customer / Administrator)
2. Login user (Admin / Customer / Officer)
3. Continue as guest

Actors involved:
• Administrator
• Customer
• Officer
• Guest

2. User Management Module

Functions:

1. View profile
2. Update profile
3. View customer details report (Administrator)

Actors involved:
• Administrator
• Customer
• Officer

3. Movie Management Module

Functions:

1. Add movie
2. Update movie
3. Delete movie
4. View movie list

Actor:
• Administrator

4. Movie Search Module

Functions:

1. Search movie by title
2. Search movie by language
3. Search movie by genre
4. Search movie by theatre
5. Search movie by city

Actors:
• Guest
• Customer
• Officer

5. Booking Module

Functions:

1. Select movie
2. Select showtime
3. Choosing No of Tickets
4. Check Seat Availability
5. Payment Conformation
6. Book ticket
7. View booking details

Actors:
• Customer
• Officer

6. Seat Selection Module

Functions:

1. Display seat layout
2. Show available seats
3. Show booked seats
4. Select seats

Actors:
• Customer
• Officer

7. Payment Module

Functions:

1. Card payment
2. UPI payment
3. Cash payment (Only via Officer)

Actors:
• Customer
• Officer

8. Report Module

Functions:

1. View movie details report
2. View booking report
3. View Customer Detail report
4. View booking report on particular date
5. View ticket cancel report

Actor:
• Administrator
