Project Title: Online Movie Ticket Booking

Problem Statement:

The "**Online Movie Ticket Booking**" system aims to automate the movie ticket booking process, providing a convenient and efficient alternative to manual bookings. It offers real-time movie listings, showtimes, and seat selection for customers.

Requirements:

1. Display cities with selected theatres.

2. Manage multiple halls in each theatre, with one movie show per hall at a time.

3. Organize multiple shows for each movie.

4. Allow customers to search for movies based on title, language, genre, theatre, and city.

5. Provide theatre and showtime details for selected movies.

6. Enable customers to select a show, choose seats, and book tickets.

7. Show the seating arrangement, indicating available and booked seats.

8. Offer multiple payment options: credit/debit cards, cash, or UPI.

Roles or Actors:

1. Administrator
2. Officer
3. Customer
4. Guest

1. **Administrator:**

Administrator manages the whole system.

- Register
- Login
- Update Profile
- Add Movie
- Update Movie
- Delete Movie
- View movie details report
- View customer details report

2. **Officer:**

Officer is the theatre counter staff who assists customers.

- View movie list
- Search Movie
- Book Tickets for customer at theatre
- Cancel Tickets

3. **Customer:**

Customer is a registered user who books tickets online.

- Register
- Login
- View Profile
- Update Profile
- View Movie List
- Search Movie

- Book Ticket
- Cancel Ticket
- Make Payment (Card / UPI / Cash (only through officer))

4. **Guest:**

Guest is an unregistered user.

- View movie list
- Search movie

Main Features of the System:

1. Authentication Module
2. User Management Module
3. Movie Management Module
4. Movie Search Module
5. Show Selection Module
6. Booking Module
7. Seat Selection Module
8. Payment Module
9. Ticket Cancellation Module
10. Report Management Module

System Modules

1. User Authentication Module

Purpose: Identify and allow users to access the system.

Functions

- Register user (Administrator / Customer)
- Login user (Administrator / Customer / Officer)
- Continue as guest

Actors

- Customer
- Administrator
- Officer
- Guest

2. User Management Module

Purpose: Manage user profile information.

Functions

- View profile
- Update profile

Actors

- Customer
- Administrator
- Officer

3. Movie Management Module

Purpose: Manage movie information in the system.

Functions

- Add movie

- Update movie
- Delete movie
- View movie list

Actor

- Administrator

4. Movie Search Module

Purpose: Help users find movies easily.

Functions

- Search movie by title
- Search movie by language
- Search movie by genre
- Search movie by theatre
- Search movie by city

Actors:
• Guest
• Customer
• Officer

5. Show Selection Module

Purpose: Used when the user directly books tickets without searching.

Functions

- Select city
- Select theatre
- Select movie
- Select showtime

Actors:
• Customer
• Officer

6. Booking Module

Purpose: Handle the ticket booking process.

Functions

- Enter number of tickets
- Create booking request
- Confirm booking
- View booking details

Actors:
• Customer
• Officer

7. Seat Selection Module

Purpose: Manage seat availability and seat choosing.

Functions

- Display seat layout
- Check seat availability
- Show available seats
- Select seats

Actors:
• Customer
• Officer

8. Payment Module

Purpose: Process ticket payment.

Functions

- Card payment

- UPI payment
- Cash payment (Officer only)
- Payment confirmation

Actors:
• Customer
• Officer

9. Ticket Cancellation Module

Purpose: Allow users to cancel booked tickets.

Functions

- **Cancel ticket**
- **Update seat availability**
- **Update booking status**

Actors:
• Customer
• Officer

10. Report Module

Purpose: Generate system reports.

Functions

- View movie details report
- View booking report
- View customer details report
- View booking report by date
- View ticket cancellation report

Actor:
• Administrator
